Overview

This document details a revolutionary technology for a decentralized platform regulated by smart contracts. The infrastructure for the Rainbow ecosystem, on all its products and services, is powered by XRB - a proprietary ERC-20 token created and maintained by the Rainbow foundation.

Rainbow Ecosystem Vision

Our vision is to create a people-powered new economy services company that makes the cryptocurrency market accessible and trustworthy to the average user, accelerating adoption of blockchain technology and democratizing ownership of both digital and traditional assets.

Crypto Market Challenges

Blockchain-powered technology is intent on leading the future of financial markets. Today, however, we still observe extensive obstacles for the development of blockchain-based markets. One of the greatest market challenges is the remaining necessity of trust towards centralized financial services in an otherwise decentralized environment. Third party custody risks affect ecosystem sustainability, bringing vulnerability to manipulative and regulative actions. Rainbow Wallet radically solves problems described above by introducing a fundamentally new platform for custody-free, transparent, immutable cryptocurrency trading. Our platform is the simplest way to connect buyers and sellers within a decentralized framework. Rainbow Ecosystem is a new type of decentralized cross-blockchain exchange.

Solutions

Rainbow Ecosystem is designed to offer specific solutions for the New Economy. An intuitive, self-custodied universal wallet that allows you to safely store, manage, leverage and further monetize your crypto assets in one place while maintaining complete control of your private keys.

A social trust ecosystem for choosing, sharing and navigating the ever-growing array of cryptocurrencies that unifies all of your financial assets to apply powerful investment models and structures to build your financial knowledge and wealth. A social gamification model that incentivizes crowd wisdom, and makes participating in the New Economy fun, social and rewarding while increasing your financial literacy, Easy and safe diversification across digital and traditional assets.

Scalable and compliant API services to empower businesses, developers and entrepreneurs to build their own powerful crypto services and product offerings Data feeds to syndicate information about cryptocurrencies and markets. Professional services to demystify the industry for businesses and developers while creating a dynamic eco-system to locate, find and engage customers in the digital economy thus reinventing traditional Financial Distribution Models.

The Rainbow Ecosystem

There are hundreds, if not thousands, of different wallets out there for all of the different digital assets, and managing multiple wallets for each of your currencies is difficult. We are creating a platform that will provide a powerful single point of interaction with the new economy while also building a dynamic bridge to the old economy to ensure nobody is left behind. This next generation digital wallet will be the backbone for our asset management and investment services platform. The Rainbow Wallet will allow to aggregate people and transactions together in dynamic ways in order to increase liquidity and keep costs down for consumers. This infrastructure also allows us to create a universal mobile payment system for users who wish to transact in any currency, instantly breaking down barriers towards mass adoption in the industry. In this section we will outline the pieces of the Rainbow Platform that will make it the most user-friendly way of storing, buying and sharing cryptocurrency on the market.

THE RAINBOW ECOSYSTEM HAS TWO MAIN COMPONENTS

RAINBOW CRYPTO WALLET This includes a decentralized wallet management system allowing for the easy transfer of value anywhere in the world. The Rainbow Wallet links seamlessly with the fiat and diversification layer.

FIAT AND DIVERSIFICATION This system includes a unique legal structure with a fiat/diversification system whose capabilities are amplified by the Rainbow liquidity network tokens.

Rainbow Crypto Wallet

The Rainbow Crypto Wallet is a wallet management system that allows users to quickly and easily interact with their coins, while tracking and monitoring diverse assets. The Crypto Wallet will allow users to view, send and receive balances of any supported cryptocurrency. The wallet manager is entirely decentralized meaning that consumers have complete control over their private keys at all times and Rainbow can't access funds without direct user authorization. All changes in balance are completely user-directed and there are no locks or limits. The goal is to create a safe and easy wallet that operates utilizing the complete user autonomy and control that cryptocurrencies afford. The Rainbow Crypto Wallet operates much like a password vault making safe and secure key management much easier than before. The Rainbow Crypto Wallet offers users a variety of features not afforded by other wallets, leveraging the unique capabilities of the Rainbow platform. Mobile support is a priority for Rainbow Wallet so that consumers can have access to their coins wherever they go.

Fiat and Diversification

A core piece of the Rainbow Ecosystem is a Fiat gateway and diversification platform. Users will be able to go seamlessly from depositing funds to diversifying across preset or custom baskets. One-Click Diversification enable users to diversify coins across a variety of cryptocurrency assets extremely easily. Users will be given complete control over all their assets at all times. Rainbow

will have a range of preset allocation arrays that users can replicate, and can adjust the percentage of asset allocations to their preference, assuming available liquidity of the underlying asset. Risk Diversification Spread funds across dozens of crypto currencies or tokens, making it less risky than purchasing an individual currency. Accessibility Cryptocurrencies become easier to purchase, enabling average participants and consumers to experience the benefits, and raising liquidity for all market participants. Community Expertise Rainbow aggregates information on different tokens and provides insightful data through community ratings and predictions so that you know what you are buying.

Rainbow Token (XRB)

Rainbow Token (XRB) is native token of Rainbow Foundation. XRB is essential to the function of the Rainbow Ecosystem. Rainbow is a Functional Token that will be used on the platform to access various features, incentivize community building and value creation through a dynamic reward system, and pay for fees. It's the fuel of the Rainbow ecosystem. Furthermore, as Rainbow becomes more liquid over time, it will be used to rebalance individual portfolios. As we grow, the liquidity generated by Rainbow Ecosystem from fee conversions and XRB trading pairs will form a "liquidity network," enabling users to shift allocations between various currencies quickly and easily and transact with each other or send value outside the platform

Token Name: **RAINBOW**

Symbol: **XRB**

Total Supply: **6 MILLION**

Decimal : **8**

Rainbow Asset management

Rainbow Wallet provides a powerful, in-demand service that allows users to reduce efforts spent on managing crypto assets and renders it transparent and trustless. To make our platform even more convenient and beneficial for users, the Rainbow Wallet team utilizes best UI and security practices thus facilitating use of our platform's functionality to the full range. Essential operations would like to do with wallet :

- Receive crypto assets to the generated wallet
- Import assets to the wallet using private keys
- Store private keys in a securely encrypted environment
- Send assets to other addresses
- Select cryptocurrency node to use
- Select blockchain explorer to use

Token Distribution

- 40% IEO and Token Sale
- 20% Marketing & Partner
- 15% Development Process
- 15% Airdrop & Bounty
- 10% Core Team

Rainbow Token Roadmap

Q4 2019

- Conception of idea
- Token create and verified
- Beta version of website release
- Whitepaper version 1.0 published
- First phase airdrop Start

Q1 2020

- Full website rollout
- List on First Exchange
- Airdrop Distribution

Q2 2020

- Rainbow wallet development Start
- App Beta Testing
- IEO On Exchange
- Airdrop Phase 2

Q3 2020

- Airdrop Phase 2 Distribution
- Rainbow wallet Release
- Top 20 Exchange Listing
- Payment Gateway Framework
- More on whitepaper version 1.1
